As developers we have also a list of features we like to have. Vote here for the pet projects and pet peeves of Alex, Bart, Dominik, Marc, Peet, and Anne!

Historical energy usage overview
1

Presets to quickly set the mood!

Link devices together for if this, then that for crownstones without even needing your phone in between!
1

Use the Crownstone as a timer (tijdschakelaar)
1

Introduce the option to not use a Cloud at all but run everything from a phone!

Improved indoor localization: quicker, more accurate and less battery usage!
1

Introduce an user choice between responsiveness and battery consumption

A beautiful separate (free) app to easily make any light a wakeup light

Leave fun messages in particular
